# Phase 4 — Vendor Portal

Completion report · Tirth Now partner portal for stays, cabs, food and experiences
30 October 2026 · Branch `claude/peaceful-fermi-hvmzt4`

| 16 | 3 | 125 | 322 |
|---|---|---|---|
| portal pages | browser tests against the live API | API end-to-end tests passing | API unit tests passing |

## 1. Summary

Hotels and dharamshalas, cab operators, restaurants and experience hosts can now run their business on Tirth Now from a web portal: sign up, finish KYC, add listings and prices, accept bookings and see their payouts. It works in test mode today (no real emails, payments or storage needed) and talks to the same API as the mobile app.

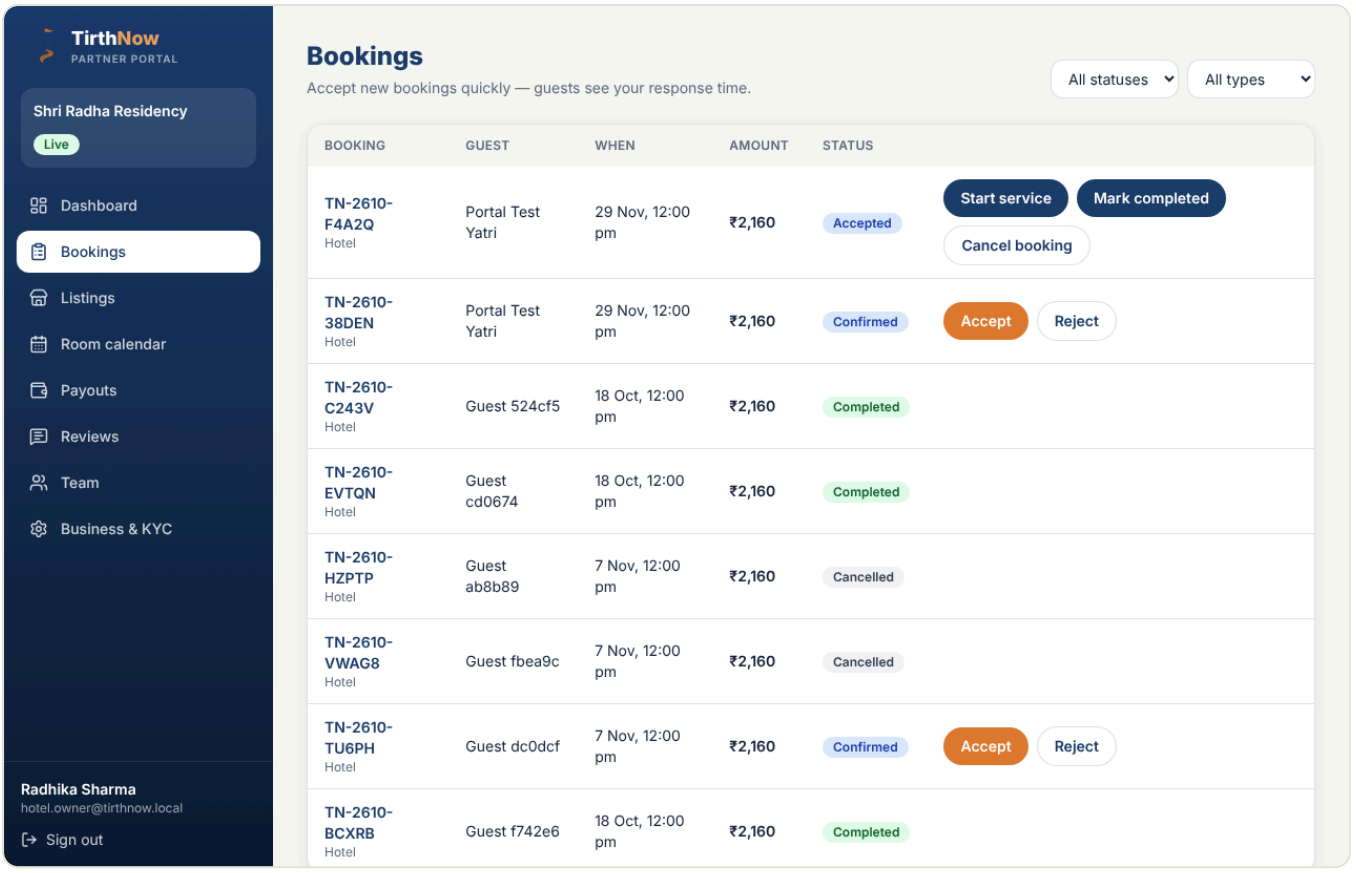

## 2. What a partner can do

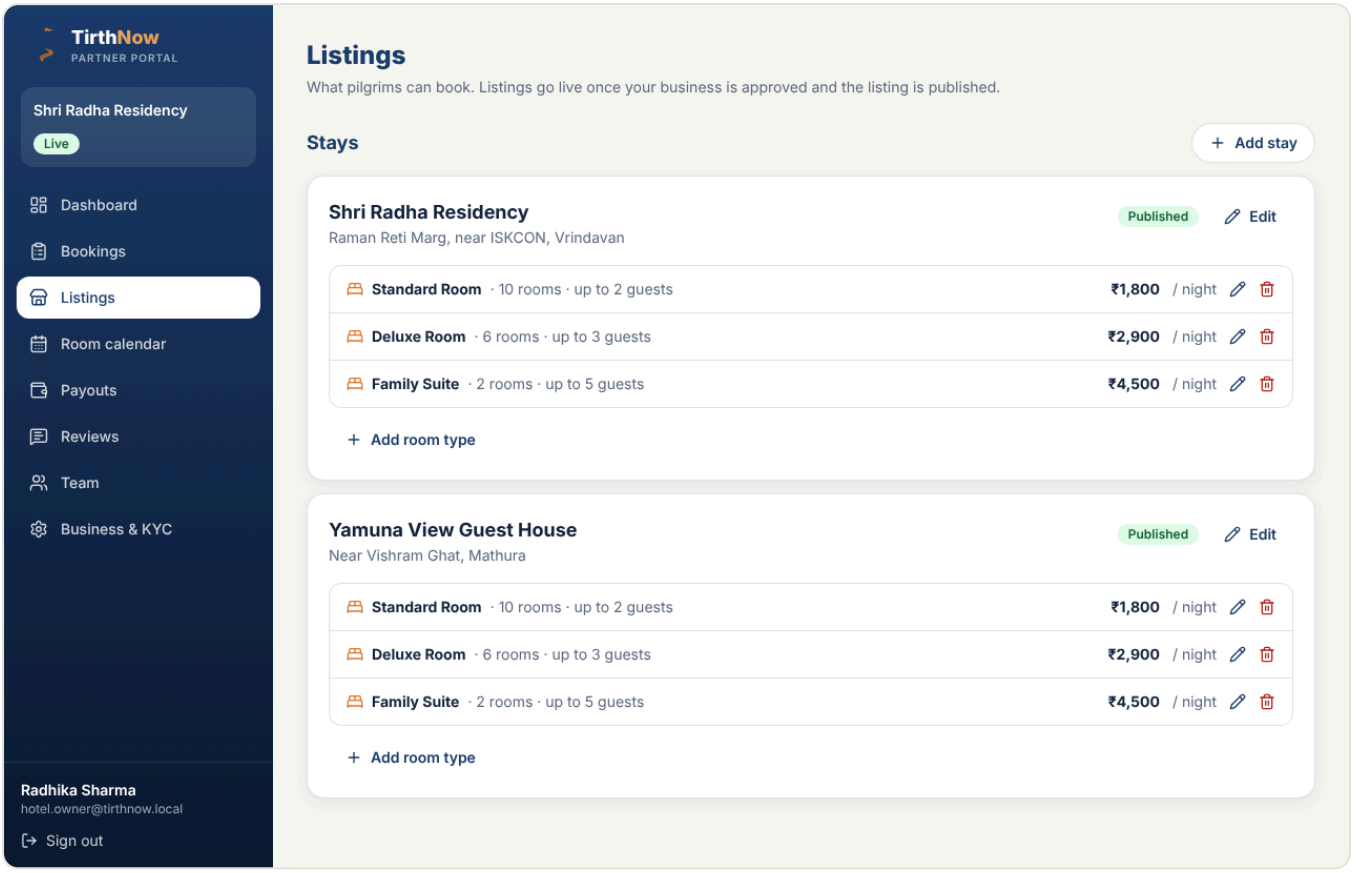

| Area | Features |
|---|---|
| Account | Sign up with email + password, sign in (with emailed 6-digit code when two-step is on), forgot/reset password, sign out |

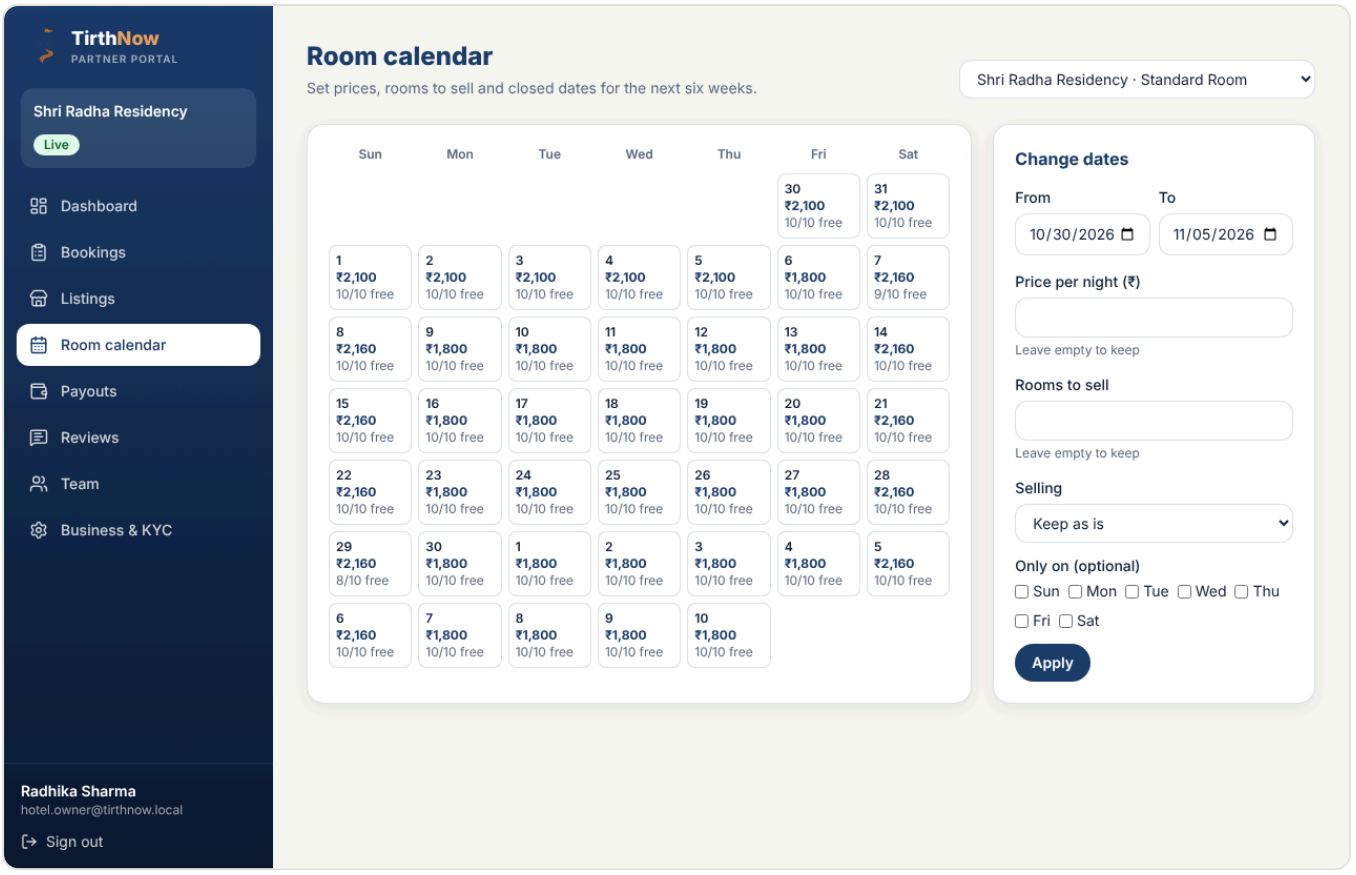

| | |
|---|---|
| Onboarding | Choose business type, names, city, PAN/GSTIN → upload KYC documents (PDF/JPG/PNG) → add bank account → submit for review; a checklist on the dashboard shows what is left |
| Dashboard | Bookings waiting to be accepted (accept/reject in one click), upcoming count, money available for payout |
| Bookings | Filter by status and type; detail page with items, amounts and history; accept, reject (with reason, guest refunded), start, complete, cancel |
| Listings | **Stays** with room types · **Cabs**: vehicles, drivers and fares per class · **Food**: restaurants and menus, sold-out toggle · **Experiences** with time slots for the next 30 days |
| Room calendar | Six-week view of price, rooms free and closed dates; change a date range, only certain weekdays (e.g. weekend prices) |
| Payouts | Available, waiting, being paid and paid-out amounts; payout history; monthly statement PDF download |
| Reviews & team | Reply to guest reviews; add managers/front desk with chosen permissions; one login can manage several businesses |

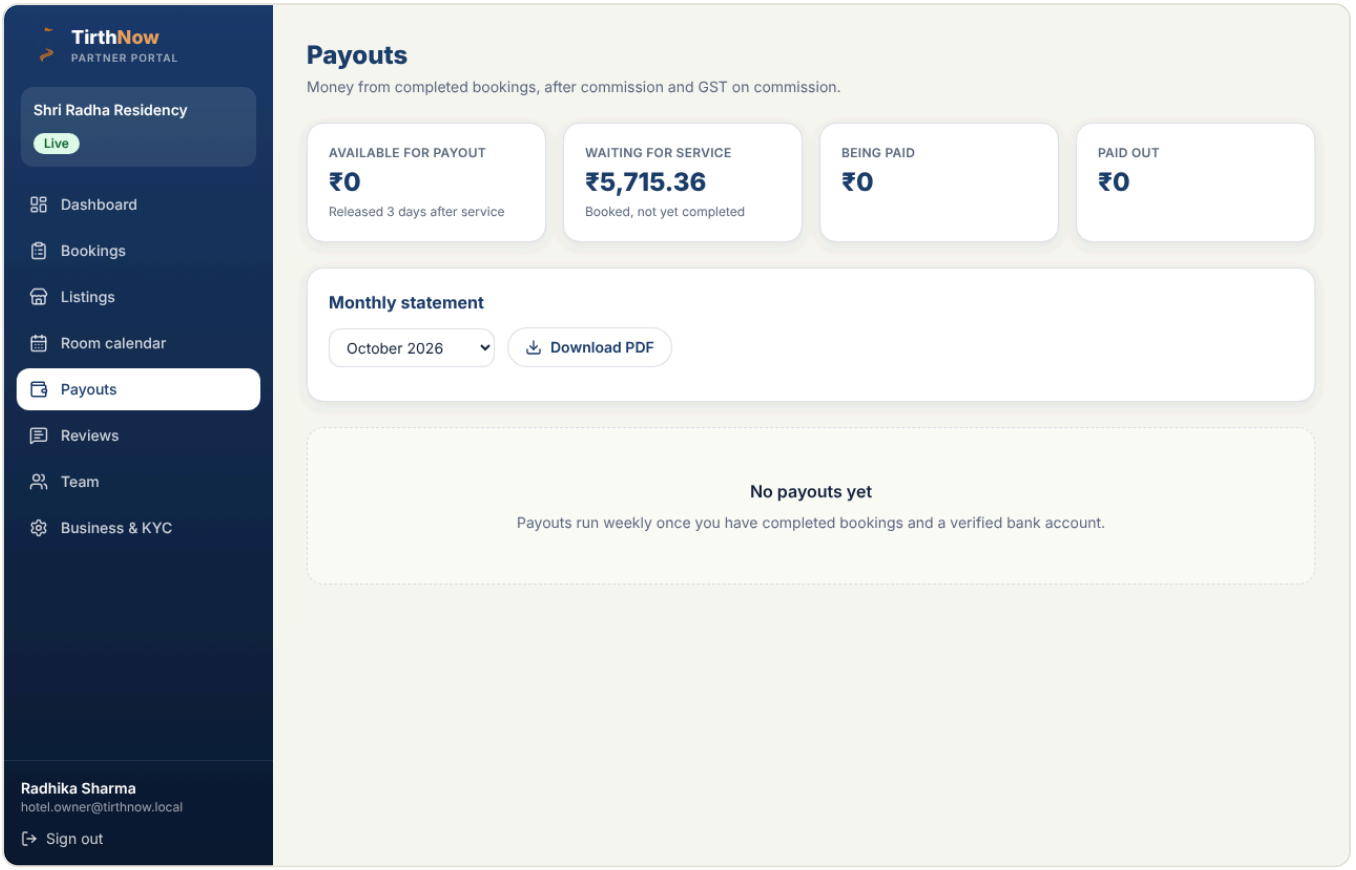

Each button only appears if the user has that permission (bookings, listings, prices, payouts, reviews); the API checks the same rules.

## 4. How it is built

| Part | Choice |
|---|---|
| App | Next.js 14 built as a static site (`apps/vendor-portal/out`) — hosts on Vercel, Cloudflare Pages or any static host; no server needed |
| API access | New `packages/api-client`: request/response types generated from the API's OpenAPI document; one shared token refresh; CI fails if types are out of date |
| Forms | Same rules as the API (PAN, GSTIN, IFSC, password strength); money typed in rupees, stored as paise |
| Design | Navy and saffron brand (ADR-0018), works on phones and desktops |
| Decision record | ADR-0019 (static portal, typed client, sign-up, token storage trade-off) |

### API changes in this phase

| Change | Why |
|---|---|
| `POST /v1/auth/portal/register` | Partners had no way to create a portal account |
| Response types for vendor payouts, reviews and cab fares | So the portal is fully typed |
| Vendor experience list includes the next 30 days of slots | So partners can see and remove slots |

## 5. Testing

| Check | Result |
|---|---|
| Portal browser tests (Playwright, real API): seeded owner tour + price change; new partner sign-up → onboarding → KYC → bank → stay + room → submit; pilgrim pays → owner accepts | **3 / 3 passed** |
| API unit / end-to-end tests (incl. new sign-up tests) | **322 / 125 passed** |
| Lint, typecheck, formatting (whole repo); OpenAPI + client up to date | **Clean** |
| New CI job "vendor portal · browser tests against the API" | **Added; runs on pull requests** |

## 6. Known limits

- Listing photos are not uploaded from the portal yet (the upload service exists; screens to add).
- Bookings refresh when you open a page; live push of new bookings comes later.
- Password-reset and sign-in codes need a real email provider (row 16 in CLIENT_SETUP_TODO).
- Login tokens are kept in the browser's storage — accepted for now, revisit with a cookie session in Phase 6 (ADR-0019).

## 7. What you need to provide

New row 23: a partner portal web address (e.g. partners.tirthnow.in) and static hosting. The API address goes in `NEXT_PUBLIC_API_BASE_URL` when building; add the portal address to the API's `CORS_ORIGINS`.

**Try it locally:** `pnpm --filter @tirth-now/vendor-portal dev` → http://localhost:3001, sign in as `hotel.owner@tirthnow.local` / `TirthNow@Vendor123`.

## 8. Next: Phase 5 — Admin portal

For the Tirth Now team: approve partners and review KYC, moderate reviews and reels, handle refunds and payouts, manage temples and aarti times, reports.
