TirthNow

Progress Brief

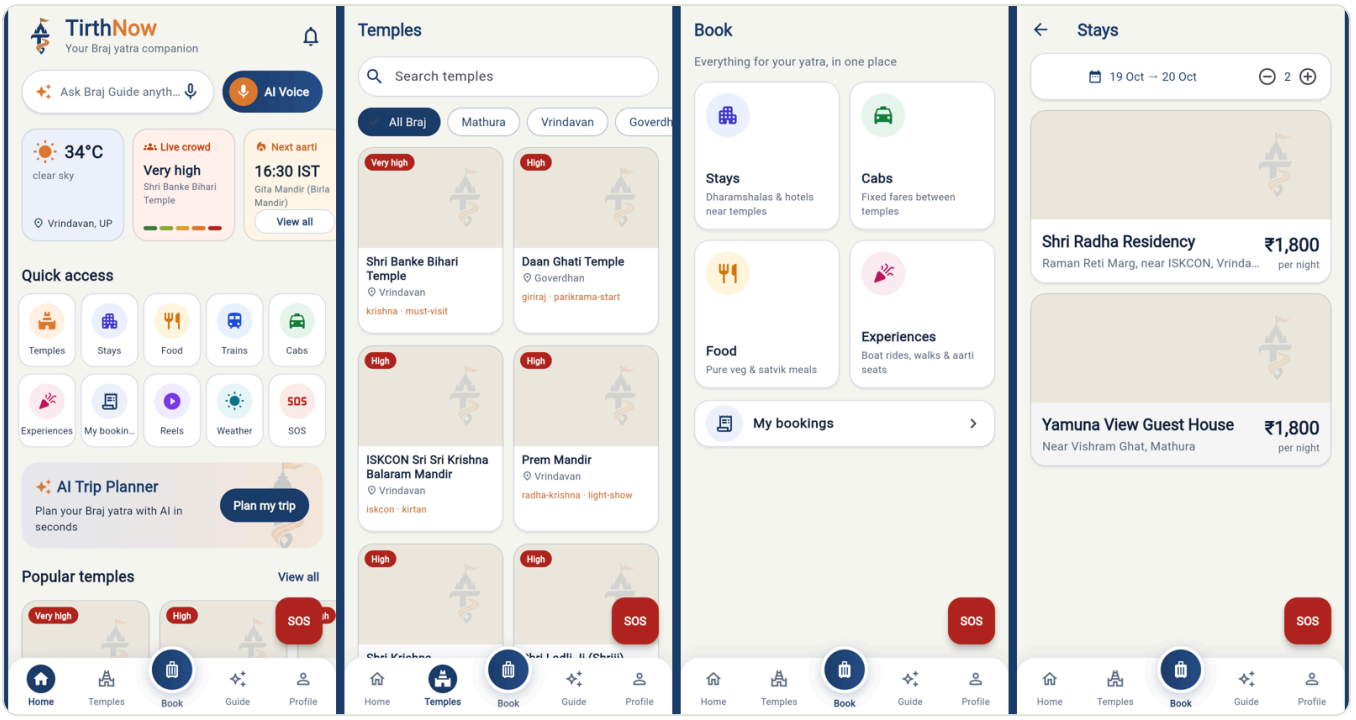

Tirth Now · What has been done and what comes next
29 October 2026

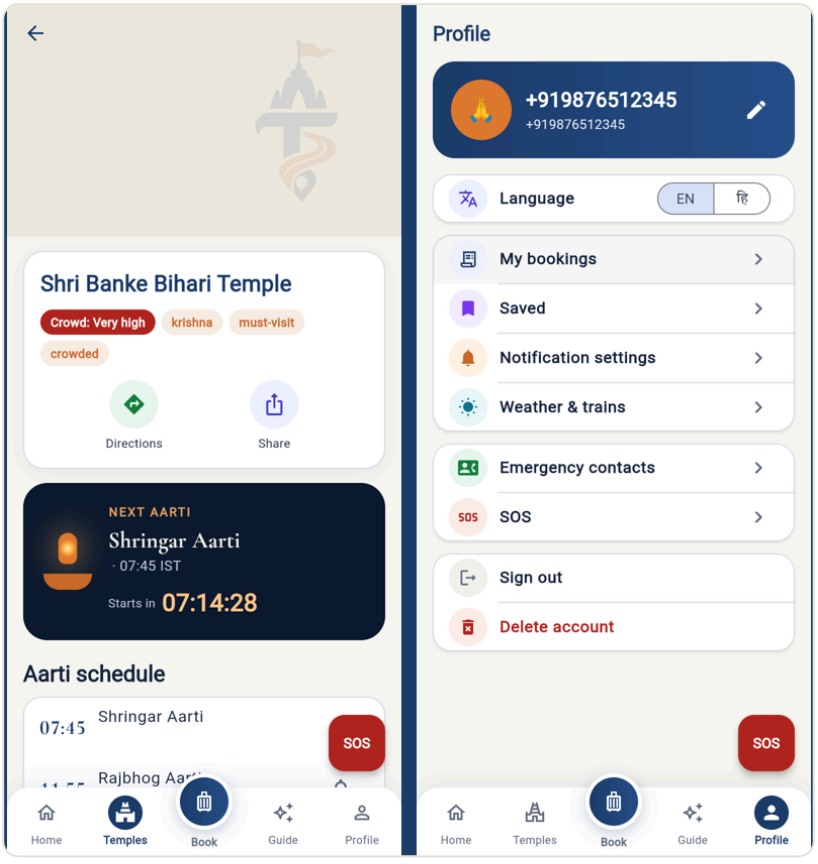

4 of 7	3	475	APK
phases complete	products built: API, website, app	automated tests passing	built on GitHub

1. Done so far

Area	What is ready
Backend API	16 modules: login, temples & aarti times, bookings (stays, cabs, food, experiences), payments with refunds and vendor payouts, SOS, AI guide and trip planner, reviews, reels, notifications, weather, trains, admin tools.
Website	Marketing site in Hindi and English, yatra packages, live darshan, interactive Yatra Journey with a voice guide, deployable on Vercel.
Mobile app	Sign-in (OTP or guest), home, temples, temple page, bookings and payment, my bookings, SOS, Braj Guide chat and voice, trip planner, notifications, reels, weather, profile. Hindi and English.
Brand & design	Navy and saffron theme from the final logo on website and app; new icons and splash screen; home, temples, book, temple page and profile redesigned in the clean card style of your reference app.
Build & deploy	CI checks on every change; installable Android APK built automatically on GitHub; Render setup for the API (region issue fixed).
Documents	Phase reports, Project Status report, Client Requirements brief, Render deployment guide.

Everything runs today in **test mode** (OTP `123456`, test payments, test SMS/AI/maps), so it can be demonstrated end to end. Real services switch on as their accounts are added.

2. What comes next

Step 1 — get it online (waiting on you, no new accounts)

Task	Who
Delete the database and Redis on Render, Manual sync, redeploy the API	You
Send us the live API and website addresses	You
Add `MOBILE_API_BASE_URL` in GitHub and rebuild the APK so the app works on any phone	You, then us

Step 2 — development (we can start now)

#	Work	Notes
1	**Vendor portal** (Phase 4)	Hotels, cabs and restaurants sign up, manage listings and availability, accept orders, see payouts
2	**Admin portal** (Phase 5)	Approve vendors, moderate reviews and reels, handle refunds, reports
3	Live order and cab updates in the app	Server already supports it
4	Reel upload from the app	Feed, likes, comments already work
5	Hardening & release (Phase 6)	Security review, load test, monitoring, store submission

Step 3 — going live (needs your accounts)

Account	Unlocks
Firebase	Real phone OTP, push notifications
Razorpay	Real payments and vendor payouts
Google Play / Apple	Publishing the app
MSG91 + DLT	SMS for SOS and bookings
Claude, Google Cloud, OpenWeather, Cloudflare	Real AI, maps, voice, weather, photo/video storage

Plus content: temple/hotel photos, verified aarti times, logo as SVG, legal pages. Step-by-step instructions for each item are in **CLIENT_REQUIREMENTS.pdf**.

Suggested order

When	Focus
This week	Render live, APK on phones, start D-U-N-S, Razorpay KYC and DLT registration (slow approvals)
Next 2–3 weeks	Vendor portal; Firebase and Razorpay switched on
Following weeks	Admin portal, live updates, reel upload, photos and content
Before launch	Hardening, store listings, legal pages, Play Store / App Store submission
